

## Mars Magnets

**Grade Level:** All

### Introduction:

In this lesson students will create their own Mars Magnets.

### Materials:

- Magnet sized Mars images (graphic provided)
- Scissors
- Clear flattened marble pieces (available at Michael's)
- Glue
- Small round magnets

### Procedure:

1. Provide each student with an image of Mars, a clear flattened marble, a magnet, scissors, and glue.
2. Students will cut out the round Mars image. Put glue on both sides of the Mars image. Glue the *image side* of the paper to the clear marble and backside of the picture to the magnet.
3. Let sit for several hours and allow students to take their Mars Magnet home to hang where they chose!
